## Summary

I'm a software developer who specializes in the .Net stack to build and maintain enterprise level web applications.

I've spent a decade in management roles where I developed skills in customer service, leadership, financial management, and creative problem solving.

Now I've taken my skill set and dedication to a new career in web development.

## Experience

### .NET Developer

Professional Rehabilitative Options, Inc

Apr 2021 - Present (6 months +)

Built and maintained features of a content management system for a company that manages workers compensation cases across the east coast. The major projects I was in charge of include:

- A granular roles and permissions system that handles everything from creating new roles and permissions to assignment to users to allowing/denying access to a;; features of the application
- A training management system that allows creation and editing of training forms, assignment to users, and progress tracking
- An interface for managing billing and guideline information for the companies we work with

### Full Stack Software Developer - .NET

Coder Foundry

Sep 2020 - Apr 2021 (8 months)

Created three primary projects, including:

- A portfolio site using HTML5, CSS3, BOOTSTRAP4, JS & jQuery.
- A Financial Portal implemented in two phases.

Phase 1: an MVC Web Application,

Phase 2: a Web Service that utilizes Swagger and Swashbuckle for integrated testing

• Fully designed and developed a multi-functional issue tracker web application, implementing enhanced roles & security, which also used a Code First Relational database designed and modeled in SQL Server. Technologies used include:

.Net Framework v. 4.6.1, MVC5, C#, LINQ, SQL, Entity Framework, jQuery DataTables

### Assistant Market Manager

Harris Teeter

Jan 2015 - Oct 2020 (5 years 10 months)

Lead various teams of meat cutters with primary responsibilities being:

- Supervision of other butchers or meat cutters
- Estimate requirements and order or requisition meat

supplies to maintain inventories.

- Negotiate with representatives from supply companies to determine order details.
- Track and report inventory and department finances
- Wrap, weigh, label and price cuts of meat.

Prepare and place meat cuts and products in display counter, so they will appear attractive and catch the shopper's eye.

- Prepare special cuts of meat ordered by customers.

Cut, trim, bone, tie, and grind meats, such as beef, pork, poultry, and fish, to prepare meat in cooking form.

- Receive, inspect, and store meat upon delivery, to ensure meat quality.

- Shape, lace, and tie roasts, using boning knife, skewer, and twine.

## **Skills**

C# • ASP.NET MVC • SQL • JavaScript • HTML5 • Cascading Style Sheets (CSS) • Creative Problem Solving • Team Leadership • Web Forms • GitHub
